INDUSTRY ADVISORY BOARD (IAB)

About Industry Advisory Board:

Our goal of providing future ready engineers to the society necessitates close involvement of the industry in our processes. The industry advisory board enables the institute to tap into immense wealth of ideas, experience and knowledge. This committee provides pragmatic approach for the operations of the institute.

Functions and Responsibilities of IAB:

- To advice regarding issues related to instructional, applied research and service activities.
- To offer perspective based on the requirements of the industry in general.
- To provide opportunities for exposure to real life problem statements for the project/research activities of students and faculties.
- To offer guidance to students and faculty on practical aspects in research projects.
- To participate in the Institute's continuous improvement process through:
 - Review and evaluation of strategic goals, plans, and new initiatives.
 - Real-world input for the program's curriculum, educational objectives and learning outcomes
- To assist students recruitment for internships and employment.
- To advocate the institute in industry fora.
- To advice and provide opportunities for skills development of students and faculty.
